

Kiewit

Situation

Kiewit’s size and experience provide the stability, predictability, and know-how that creates high expectations for their clients and partners. To match their expectations, Kiewit enlisted SKC Communications (now AVI-SPL) to contribute to the design and renovations of two buildings, as well as contributions to a new third building.

Solution

We provided all AV services for the new building, including specialty areas such as a pitch room, executive boardroom, auditorium, atrium, and training rooms. Additionally, we outfitted and integrated conference rooms of varying sizes throughout the buildings. In the auditorium and atrium, we installed 220” Primeview LED walls and 138” Primeview LED walls in the pitch room and executive boardroom.

Results

Over two-hundred conference rooms throughout all buildings are powered by Crestron control and video switching, audio processing by Biamp technology, and all rooms feature Samsung displays, many of which have dual displays. Four different rooms highlight direct-view LED technology from Primeview. All spaces throughout the building feature Mersive wireless presentation technology. This design and installation have set the tone for Kiewit room standards and functionality requirements across the enterprise.

Technologies Used

- Biamp
- Crestron
- Legrand
- Mersive
- Poly
- Primeview
- Samsung
- Shure

About AVI-SPL

AVI-SPL is a digital enablement solutions provider who works with organizations globally to improve team collaboration and unlock new business value. We are the largest provider of collaboration technology solutions, which includes our award-winning managed services. Our highly-trained team works hand-in-hand with organizations worldwide – including over 80% of Fortune 100 companies – to strategize, design, deploy, manage, and support AV and UC solutions that are simple to use, scalable, secure, and measurable to ensure business objectives are achieved.
