

# Intergovernmental Organization

## Situation

After renovating a space that has gone untouched for more than a decade, this intergovernmental organization looked for ways to modernize outdated DLP cubes with cutting-edge visual displays. Each of the two walls had disparate processors, which created complications when managing content.

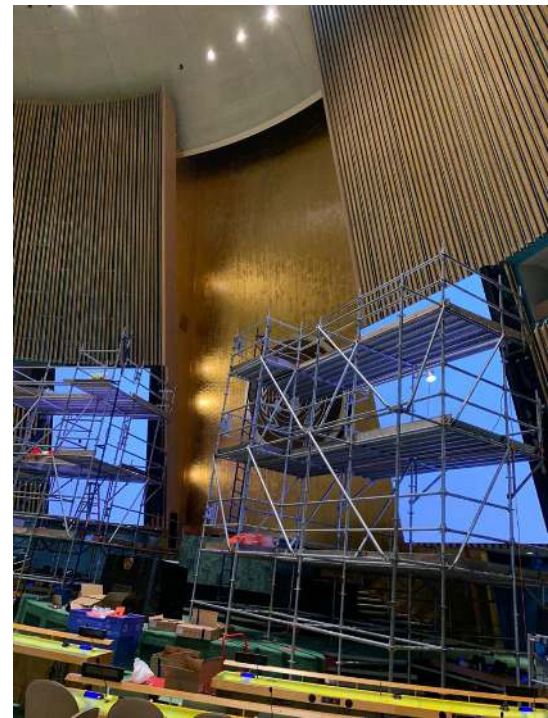

## Solution

SKC Communications (now AVI-SPL) and RP Visual Solutions designed and built the specially made structure to accommodate a new LED display system. Primeview’s Fusion PRO 1.2mm was selected for the video walls with tvONE handling image processing, using a single CORIOmaster. Each display measures approximately 17’ tall by 12’ wide. Together, the displays combine for a total of 23,328,000 pixels.

## Technologies Used

- CORIOmaster
- PRIMEVIEW
- tvONE

**About AVI-SPL**

AVI-SPL is a digital enablement solutions provider who works with organizations globally to improve team collaboration and unlock new business value. We are the largest provider of collaboration technology solutions, which includes our award-winning managed services. Our highly-trained team works hand-in-hand with organizations worldwide – including over 80% of Fortune 100 companies – to strategize, design, deploy, manage, and support AV and UC solutions that are simple to use, scalable, secure, and measurable to ensure business objectives are achieved.
