

Yealink

Yealink Device Management platform

YDMP & YMCS

AGENDA

-  ABOUT YEALNK DEVICE MANAGEMENT PLATFORM
-  KEY FEATURES INTRODUCTION
-  PRICE STRATEGY
-  ROADMAP

WHY REQUIRE DEVICE MANAGEMENT PLATFORM?

RPS SERVICE

Reduce time and cost for batch devices configuration

“PRECAUTIONS” OPERATION

Monitor devices actively and ensure excellent call experience

REMOTE DIAGNOSE

Deploy, detect, access devices and troubleshooting remotely

Complexities of provisioning, management, call quality control and troubleshooting requires a device management platform to maintain.

WHO REQUIRE DEVICE MANAGEMENT PLATFORM?

Customers

Include ITSP, SI, Reseller, End user who may require API integration, mass configure, customize per region/department/model, call quality analysis, and trouble shooting of devices.

Distributors

Introduce device management platform based on customers requirement to earn profits;

 **ABOUT YEALNK DEVICE MANAGEMENT PLATFORM**

Aims: Provide easy/flexible deployment / management

Device Compatible : Yealink SIP/Teams/SFB/MVC/VCS/USB

- Comprehensive tool set for deployment, management and troubleshooting for up to 20,000 devices
- Web-based intuitive user interface
- Timing task for scheduling tasks at pre-defined times or after specified time intervals
- Real-time feedback: operation statistics, quality analysis and alarm notifications to diagnose devices when the platform shows abnormality

YDMP

YEALINK DEVICE MANAGEMENT PLATFORM

YMCS

YEALINK MANAGEMENT CLOUD SERVICE

Batch Deployment

Device Management

Customized Group

HIGHLIGHTS:

- Remote trouble shooting
- Real-time Alarm and Diagnoses
- Remote Reset/Reboot
- Timing tasks with flexibility
- Graphical QoE
- API for deep integration
- Yealink SIP/Teams/SFB/MVC/VCS
- Deployed based on cloud (YMCS)

Multiple Administrators

Administrator

Single Role:
Enterprise administrator

Charge by Time & Quantity

The Cost

License One-Off Charge with Quantity
& Hardware Cost

- Suit to small and medium enterprise
- OPEN Network Environment
- Multiple Level: Manage Separately
- Easy to Use with Account Login Only
- Provide RPS service

More Info

- Applicable to medium and large enterprise
- Deploy Locally & Concern with Data Security
- Database: Host Locally
- Ability for Server Operation & Maintenance

 **KEY FEATURES INTRODUCTION**

How to configure 1K T48S?

Traditional way

Batch update CFG

Configure Autop server address

×1000 Time

Restart phone manually

Phones get configuration via Autop URL

*Make sure MAC address correctly

*Cost about 3 days
(manual + download + update)

YDMP or YMCS

Create configuration Batch configuration(Site/Model/Group) on platform directly

Connect to YMCS
Push Config to phones

*Configuration can be changed at any time

*Configuration updates can be completed in real-time

Benefits of YDMP & YMCS

Easier job
Reduce configuration errors

Save time
Real-time configuration update

Real-time Call Statistics
Monitoring alarm abnormal status

Personalized grouping
Manage configuration and updates

- Supports quick positioning of device issues through remote diagnostics
- Diagnostic include: packet capture, network detection, system log export, configuration file export, device CPU memory status, recording, screenshots

Device diagnostic

 Login name : 2237 IP : 10.81.41.1 Model : SIP-T42G Device type : Audio device [End diagnostic](#)

| <input type="checkbox"/> | 001565476257-1524154224... | 2018/04/20 00:10:24 | 6602.02 |   |

Device Diagnostics: Only allow dial out rather dial in?

Benefits of YDMP & YMCS

Reduce communication cost with administrator

Quickly locate devices Issue

Optionally set "wrong operation" alarm
Reduce low-level error feedback

- Graphical statistical with call quality.
- Record and monitor each call.
- Audio details with jitter duration, packet loss rate, delay duration etc.

Call statistics Export Refresh

Custom time: 2018/04/26 00:00:00 to 2018/04/26 23:59:59

Call quality

KEY FEATURES---Alarm Management

- Real-time Alarm notification;
- Set Alarm strategy: set up difference Alarm levels: general, major, and severe according to your needed.
- Full Alarm types include: poor call quality, registration failure, firmware upgrade failure, DNS resolution error, etc.

- Supports to set a scheduled task to facilitate the management in a specified time;
- Set scheduled tasks allows administrators to implement management tasks during off-hours;
- Supported scheduled tasks include various remote control events, such as update configuration, firmware upgrade, restore factory, reboot, etc. Also you can view the execution result of each task, and failed records.

Timer task management

+ Add timer task

Cancel

Poor Audio Quality Issue

*Passive Feedback with Low Aging
*Not Clear of the issue

*Real time Alarm, High Aging
*Issue clearly with Statistical
*Remote Diagnostic with quickly

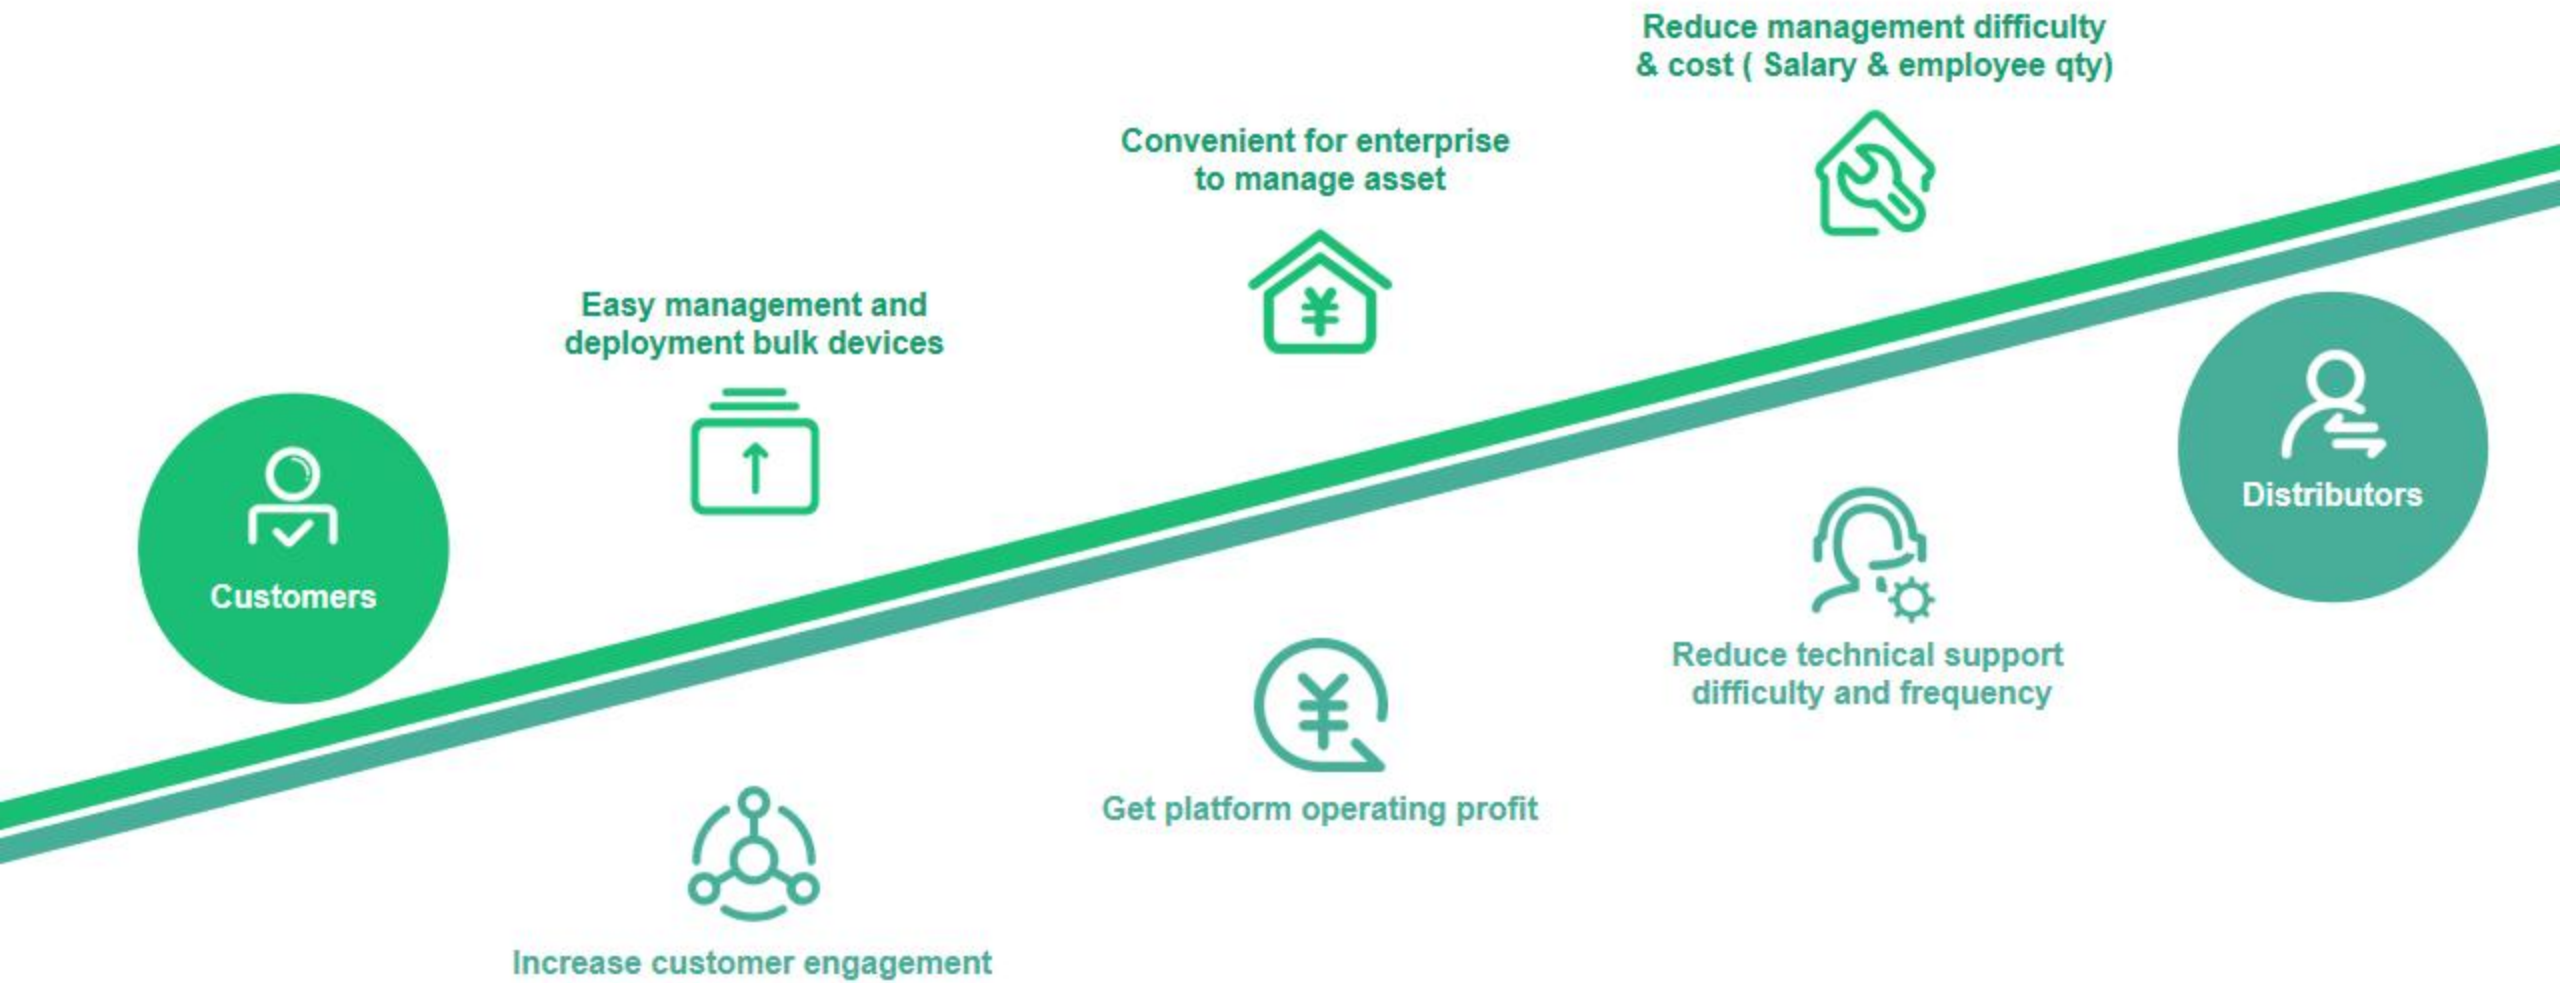

Benefits of YDMP & YMCS

Locate Issue Clearly
Easy To Get Debug Files
Fixed issue quickly

“Precautions” Alarm
Solve Issue with Efficiently

 **PRICE STRATEGY**

- ◆ **For End Users**, license subscription shall be bound to device quantity requirement that:
 - 1) Devices quantity for a license is multiples of ten; Minimum quantity of devices must reach 100;
 - 2) If less than 100 devices, price will be calculated based on 100 devices* Unit Price.
- ◆ **For Distributors**, you shall specify devices quantity against each license subscribed from End Users. License orders from different End Users can be consolidated into one order.

| Model | Quantity | MSRP (per device) |
|---|-------------|-------------------|
| YDMP Device Quantity License (One-Off License) | ≥100 device | \$4.90 |

Preferential policy: Each customer has 1000 device quantity **free for 3 years** .

YMCS-Essential: Include Device List, Firmware and Resource Management, Account Management, Order Management, Configuration, Site Management, Timer Task, Running State (Dashboard), Operation Log, Sub-account.

YMCS-Professional: Besides the features included in YMCS-Essential, Alarm Management, Call Statistics and Diagnostic are included.

| Model | Quantity | MSRP (per device/per year) |
|--|-------------------|-------------------------------|
| YMCS-Essential | <=1000 devices | free 3 Year |
| | 1001~5000 devices | \$4.90 |
| | >5000 devices | \$4.90 |
| YMCS-Professional | <=1000 devices | free 3 Year |
| | 1001~5000 devices | \$9.90 |
| | >5000 devices | \$9.90 |
| YMCS-Professional Existing YMCS-Essential Upgrade | 1001~5000 devices | \$5.00 |
| | >5000 devices | \$5.00 |

How to join Yealink YDMP or YMCS?

YDMP: Apply below info to your distributors, and **Yealink** will help open License accordingly

YMCS: Apply below info to your distributors, then **distributors** will contact and apply license accordingly

- The Enterprise name (please also provided the email address)
 - The distributor name
 - The applicant
 - The country
 - The quantity
- (**YDMP**: How many phones do you have and how many licenses you require)
- (**YMCS**: How many devices and how many years you require)

2019 Q3

Functions

- Enterprise sub-account permissions
- Multi-hierarchy management
- Provide third-party deployment platform and YMCS compatible solution
- open API

Device Support

- MTR device management
- Yealink USB device management

2019 Q4

Functions

- Graphical configuration optimization
- Devices are automatically assigned to the site
- Site Configuration
- Security policy improvement

Device Support

- Yealink DECT device
- Yealink USB device diagnose and alarm
- MTR device upgrade
- Zoom kit device management/upgrade
- Third party phone support

2020 Q1

Functions

- Agent support
- Support cluster deployment (YDMP)
- Alarm optimization
- Statistical reports
- Device Map

Device Support

- Third party headset support
- Gateway support

2020 Q2

Coming soon...

- Multi languages
- White label
- The data analysis
- Data screen
-
