What Yealink Delivers for Large Rooms

Intelligent Tracking Cameras - UVC86

Stay Intelligent, Stay Focused

AI-Powered Features

- Presenter Tracking
- Speaker Tracking
- Auto Framing

Superior Video Quality

- Dual 4K Camera, 12X optical zoom

Scalable and Flexible Integration

Be Flexible, Be Affordable

Capture Details in Every Corner

With the Yealink AVHub, users are allowed to enable multiple cameras simultaneously from a single room, better capturing participants and providing different views of the rooms for various scenario usages.

Flexible Audio Options

Users can choose any Yealink voice devices for Microsoft Teams, or audio solution from the mainstream third-party providers including Shure and Biamp. Upgrading your system doesn't necessarily mean a replacement for existing devices. The upgrade can also be cost-saving.

Connect with Your Team Everywhere

Yealink MVC-BYOD-Extender supports the transformation between Microsoft Teams Rooms (MTR) and different UC platforms. Start meetings anywhere you want with dedicated devices.

Broad Integration for Quality Collaboration

Integrated with mainstream AV platform including Extron, Biamp and Shure, Yealink's solution for large rooms offer more flexibility and possibilities for users' audio and meeting control needs.

Yealink Recommends

For Large Conference Rooms

10 - 20 People

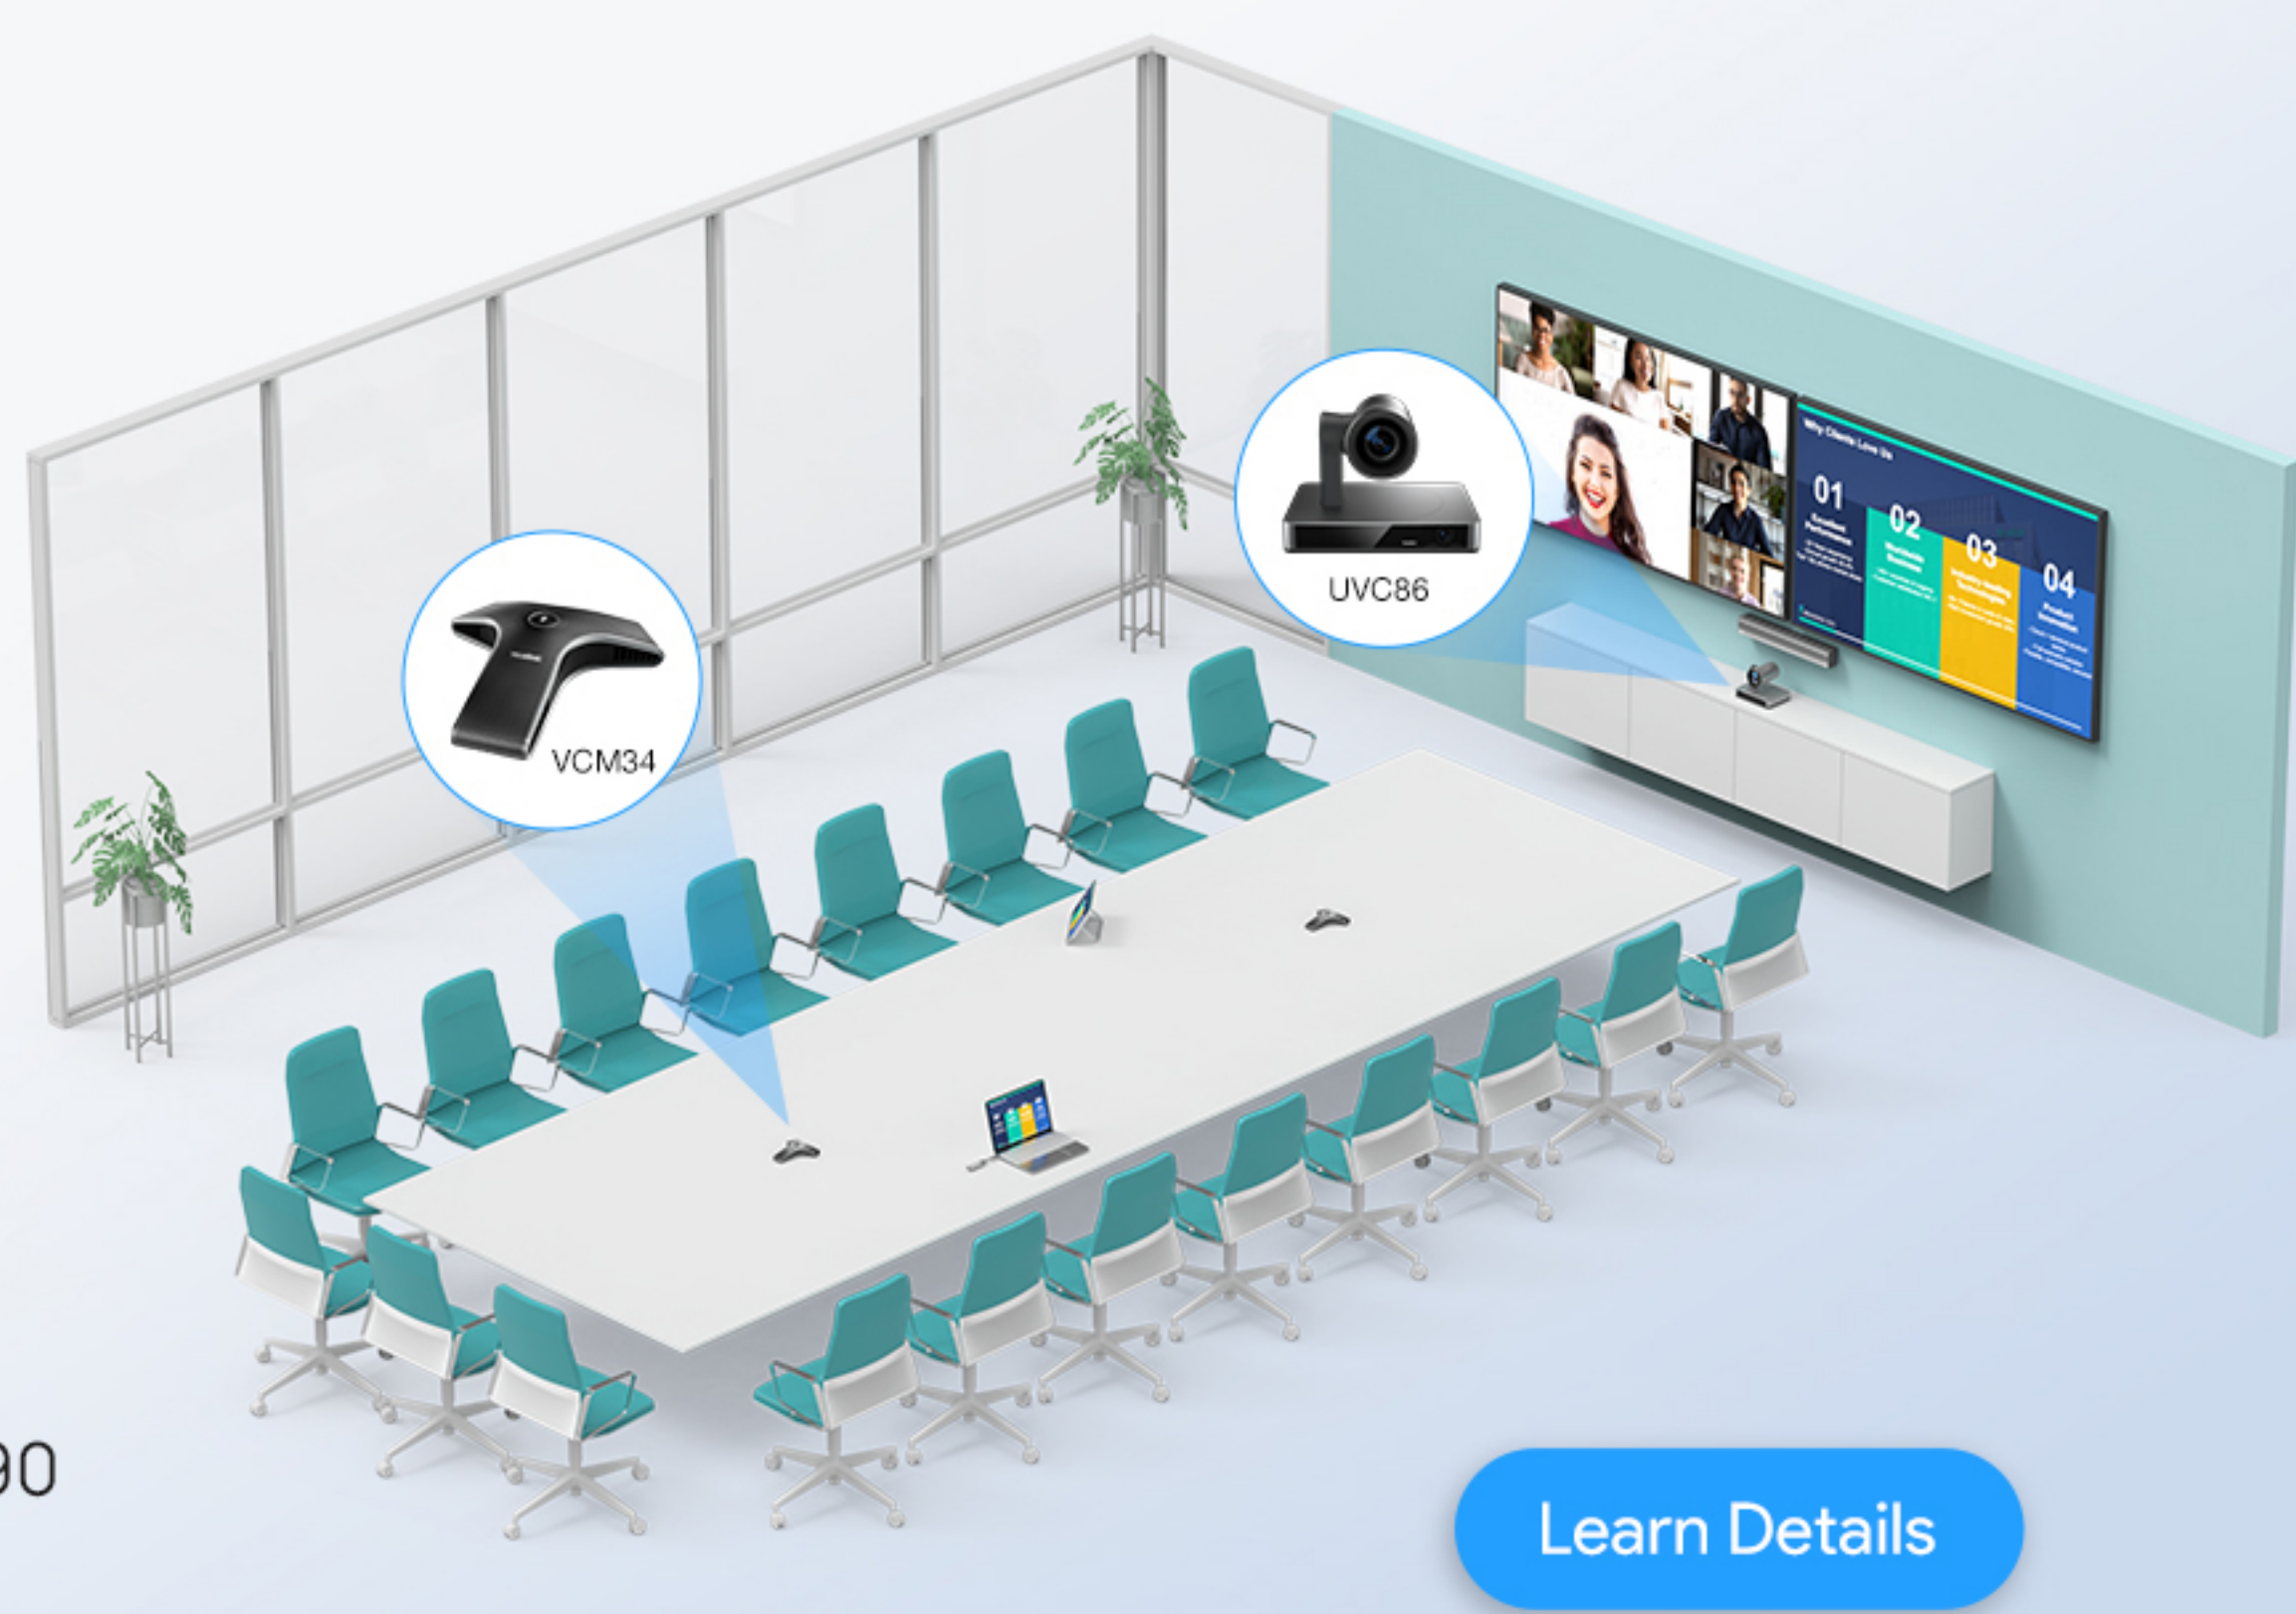

MVC860

Track Every Movement Smoothly

· Featured with Presenter Tracking, the UVC86 in the bundle ensures participants enjoy an accurate and smooth tracking experience whenever meeting participants are present with the business data.

Flexible Audio Option Fits Your Needs

· Users can choose voice pickup devices including the Yealink VCM34 microphone, VCM38 ceiling microphone, and the CPW90 wireless microphone, according to their particular needs.

For Training Rooms

20 - 30 People

MVC960

Pro-Grade Video Experience

· The Presenter Tracking feature of UVC86 always keeps the instructor in the center of the screen, allowing distant participants to keep up with the presenter.

· Paired with Yealink BYOD Extender, the MVC960 enables employees to join external training in third-party platforms and enjoy premium video quality with dedicated devices.

Broad Audio Compatibility

· With AVHub in the MVC960 bundle, users can choose an audio solution from mainstream third-party providers depending on their current needs.

For Hybrid Classrooms

30+ People

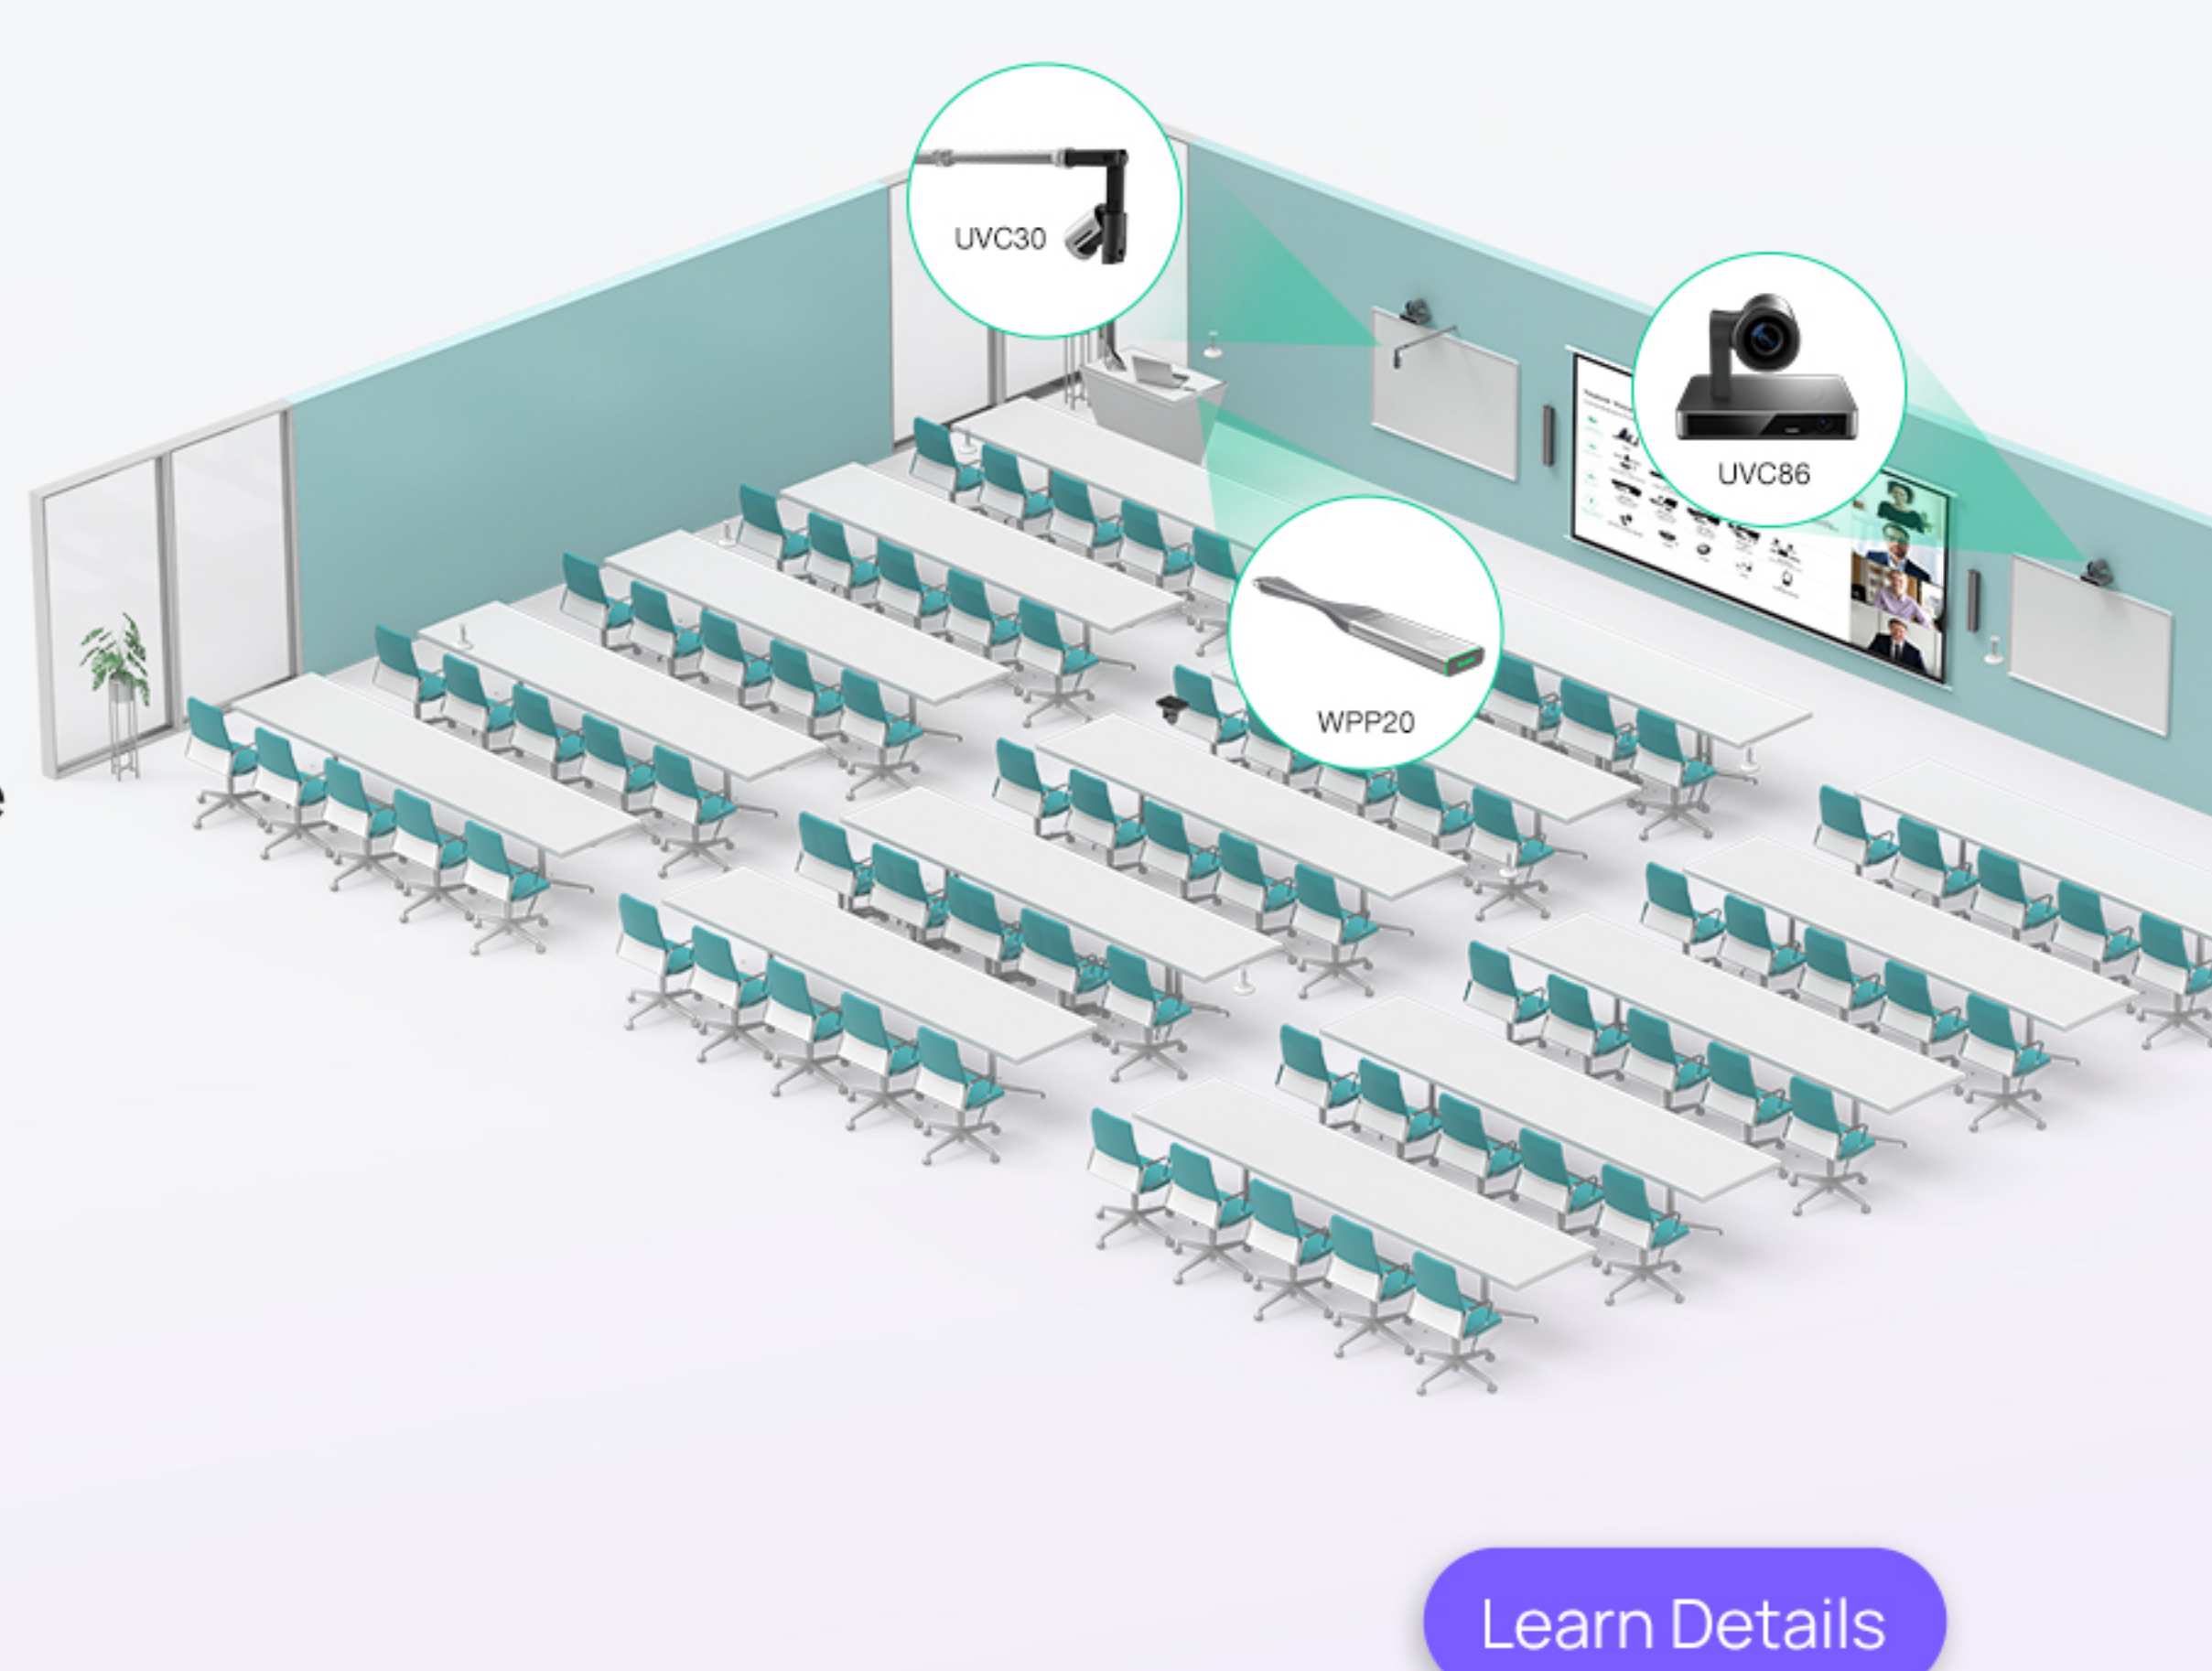

MVC960 + UVC30 or MeetingBoard 65

Keep Everyone Engaged

· With the multi-camera system and AI-powered tracking features, MVC960 frames everybody in the best view and tracks not only the lecturer but also the students who raise their hands to speak.

· The unique content camera, UVC30 allows lecturer to share the visibility optimized notes with remote students. The lecturer's body is also somewhat transparent, so they don't block or obscure the board.

· The Wireless Presentation Pod WPP20 offers plug-and-play and one-click content sharing even in an extra-large conference space, making it easy and fast to share slides and improve the efficiency of courses.
